

Dear Sir/Maddam,

I am writing to express my interest in the position of Junior Software Engineer at Tote Group. I am a dedicated and responsible International Business graduate who has recently completed an industry-led software developer pathway course at the UK's leading coding school, Northcoders. I am seeking a full-time position that will utilise my commercial, organisational and technological skills and I believe this role can fulfil this. I am very interested in this role as I have the right combination of knowledge and skills that makes me a strong candidate to become part of the team.

I have successfully completed a full-stack coding bootcamp and throughout this process I have gained a valuable insight into the dynamic structure of the tech industry. As a Junior Software Engineer, I am excited to develop my role within this industry further through working with Tote Group.

I have the skills and training needed to help develop and maintain software programs and to make improvements that will enhance functionality. I have outstanding problem-solving skills with the ability to work with technical and abstract concepts efficiently. I have extensive knowledge of JavaScript, Node.js, HTML5, CSS, React, HTML and have built an API using express.js. I have also developed a mobile application using Flutter and Dart using both Android Studio and Xcode. In addition, I enjoy learning new languages in my own time.

I have a clear, logical mind with a practical approach to problem solving and a drive to see things through to completion. Coding has enabled me to further my curiosity into problem solving and how the world of tech works. I will bring these skills to this job role along my dedication and 'can-do' attitude.

Thank you for your time, it would be a privilege to be considered for this role.

Yours Sincerely,

Jonathon Riley
